 Frisco, TX

SKILLS

LANGUAGES

JavaScript CSS (BEM)
ES6 SCSS
HTML GraphQL

LIBRARIES/FRAMEWORKS

React.js Node.js
Redux Bootstrap
Gatsby.js Axios

TOOLS & PLATFORMS

Git/Github Firebase
Webpack Netlify
VS Code Wordpress

CONCEPTS

RWD REST
OO(D)P JSON
SPA

EDUCATION

TEAM TREEHOUSE

treehouse.com
Front End Development
2019-2020

UNIVERSITY OF OTTAWA

Ottawa, ON, Canada
Bachelor of Soc. Science
2012 - 2015

EXPERIENCE

APPAREL E-COMMERCE STORE

Live demo: bit.ly/2zANP8M

- Used React.js to build the front-end of an e-commerce store - including cart, checkout, and search features
- Managed state via actions and reducers in Redux
- Used React-Router for Single Page Application functionality
- Used redux thunk to integrate product data from Cloud Firestore database
- Used media queries, Flexbox, and CSS Grid to create a mobile-first, responsive interface

Environment: React.js, Redux, React Router, Firebase,

INSTAGRAM ANALYTICS DASHBOARD

Live demo: bit.ly/30E4hAh

- Used React.js to build a dashboard web application for analyzing instagram profiles
- Consumed JSON data from IGBlade API using redux thunk and axios
- Visualized data in a chart format using Apex Charts
- Used Bootstrap's grid system for layout and cross device usability

Environment: React.js, Redux, React Router, IGBlade API, Apex Charts

CENEX CONSULTING

Live demo: bit.ly/2UdCv9L

- Brought website design to life using Gatsby.js
- Set up continuous deployment with Netlify
- Built all pages and components using React.js
- Used GraphQL to query data into static pages
- Used a combination of SCSS media queries and Bootstrap for site responsiveness

Environment: React.js, Gatsby.js, GraphQL
